

ABDELMAGED HAMDI

Frontend Developer

abdelmageedhamdi@gmail.com ♦ [linkedin.com/in/abdelmageed-hamdy](https://www.linkedin.com/in/abdelmageed-hamdy) ♦ [Github](#) ♦ [Portfolio](#)

OBJECTIVE

Highly motivated and results-oriented Front-End Developer with a strong foundation in HTML, CSS, JavaScript, and popular frameworks (React, Angular). Eager to leverage my skills and passion for web development to contribute to a fast-paced and collaborative team environment.

EDUCATION

Bachelor's degree, faculty of science.

(09/2017 - 08/2021)

Tanta University

Modern React with Redux - Udemy

(05/2022)

Udemy Course Completion Certificate | Udemy 

React Tutorial and Projects Course – Udemy

(08/2022)

Udemy Course Completion Certificate | Udemy 

SKILLS

Technical Skills: Html - Css - Sass - Javascript - AJAX - Jquery - Bootstrap - tailwind - ReactJS - Redux Toolkit

Angular - Typescript - Axios - Git- Github

Familiar with Firebase - Figma

Soft Skills: Attention to Detail - Self-Motivation and Initiative -Adaptability and Flexibility

Continuous Learning and Improvement

PROJECTS

1. Job Tracking Application (React):

- Built with React for a user-friendly interface.
- Utilizes React-Router for seamless client-side navigation.
- Leverages Axios for efficient data fetching from an API.
- Implements Redux Toolkit for robust state management (store, actions, reducers).
- Enables adding, updating, and deleting jobs within the application.
- Employs styled components for a visually appealing design.

2. Comfy Store Application (React):

- E-commerce application built with React for a dynamic shopping experience.
- Utilizes React-Router for smooth client-side routing.
- Leverages Axios for efficient data communication with an API.
- Employs Context API for effective state management across the application.
- Integrates Auth0 for secure user authentication.
- Implements Stripe for secure payment processing.

[Demo](#) - [Github Repository](#)

3. ManchesterCity Application (React):

- React application dedicated to Manchester City fans.
- Utilizes React-Router for seamless client-side navigation.
- Employs Firebase for robust backend functionality and user authentication.
- Leverages Context API for effective state management across the application.

[Demo](#) - [Github Repository](#)

4. FreshCart Application (Angular):

- Feature-rich e-commerce platform developed with Angular.
- Streamlines product browsing for a user-friendly shopping experience.
- Implements efficient shopping cart management for easy order creation.
- Enables user account creation and management.
- Employs responsive design for optimal viewing on all devices (mobile, desktop).

[Demo](#) - [Github Repository](#)

5. E-commerce Application (MERN Stack):

- Full-fledged e-commerce application built with the MERN stack (MongoDB, Express, React, Node.js).
- Utilizes MongoDB for scalable and flexible data storage.
- Leverages Express.js for robust backend development.
- Employs React for a dynamic and user-friendly frontend.
- Offers functionalities like product browsing, cart management, secure checkout, and order tracking.
- Integrates user authentication for secure accounts.
- Implements Stripe for secure payment processing.
- Designed for scalability to handle growth efficiently.
- Provides a seamless and secure online shopping experience.
